Prof. Buchanan is in charge of the Geodetic Survey of Tennessee, under the direction of the United States Coast Survey, and spends the time not required for his college duties, in this work. The instruments are furnished to him by the government, and are the best to be had, and the work done is the most accurate possible. Through the courtesy of the Superintendent of the Coast Survey, Prof. Buchanan is permitted to use these instruments in his class instruction.

*Recited in the afternoon.

Thus unusual facilities are afforded students in this line for observing the practical operations of Astronomy and Geodesy.

The Tennessee Base Line, from which the triangulation of the State is to be made, is situated at Lebanon. Prof. Buchanan measured it during the summer of 1877, determined its Azimuth, and the latitude of North Base, in 1878, and is now proceeding with the Primary Triangulation.

SUGGESTIONS TO OUR PATRONS.

If possible, every student should enter the institution on the first day of each Term. Minors should never be left to select their boarding house or course of studies, nor should they ever be allowed to open accounts in the stores. The general course of study has great advantages over all special courses.

LIBRARY AND READING ROOM.

The University Library contains nearly 7,000 volumes. It is open every day except Sunday. Considerable addition has been made to the Library since our last Catalogue.

CABINET OF MINERALS AND FOSSILS.

This includes many fine specimens, and additions are constantly being made. The friends of the University will confer a great favor by sending to the Professor of Natural Science anything of this kind that they can secure.

The Philosophical and Chemical apparatus is amply sufficient for the full illustration of the course.

LITERARY SOCIETIES.

There are three Literary Societies in the University, all in active operation.

PRIZE.

The Edward M. Neal prize is awarded to the best declaimer of the Preparatory School.

COLLEGE CODE.

The laws of the University are rigidly enforced, and all embraced in the motto, "Semper præsens, semper paratus."

The next term begins September 6, 1880.

LAW SCHOOL.

PROFESSORS.

ROBERT L. CARUTHERS.

NATHAN GREEN.

ANDREW B. MARTIN.

JUNIOR CLASS.

Caruthers's History of a Law Suit, Stephens's Pleading, Kent's Commentaries, Greenleaf's Evidence, first volume.*

SENIOR CLASS.

Barton's Suit in Equity, Story's Equity Jurisprudence, Bishop's Criminal Law, Parsons on Contracts.

This course may be completed in ten months. Students may begin in September or January. It is believed that every subject likely to be encountered in practice will be found treated in the course. As only ten months are required, students will be expected to enter promptly at the beginning of each term.

Those who read the Junior course privately and apply for admission to the Senior Class, with a view to graduation, will be subjected to a rigid examination. If it is approved by the Faculty, the candidates will take their places in the Senior Class on the same footing as other members. It is most earnestly urged, however, upon all who possibly can, that they enter the Junior Class. Failing to do so, they miss much of the practice and drilling in elements and in forms taught in that class every term. A license to practise and a diploma will be given to all who are graduated.

No previous reading of law or any special literary qualification will be required to enter the school. The common law, applicable in all the States, is taught, though not by lectures. The law is in the text books. The Professor can no more make law than the student himself. It is better, therefore, that the student be required to learn a portion of the text and be subjected to an examination in the presence of his class each day. It is the business of the Professor to conduct this examination, and explain difficult passages when necessary.

*The first volume of Greenleaf is a complete work on the law of evidence.

That full justice may be done to the students, two of the Professors of this Law School devote their whole time to the work. Regular lectures on the law are not delivered, as they would only divert the minds of the students from their daily work. Every subject upon which a lecture could be given has been exhausted by the ablest Professors, and printed in books after the most careful revision by the authors. We would regard it as an imposition on students, and as presumptuous on our part, to pretend that we could improve upon Kent, Story, Greenleaf, Parsons and others, who have given to the public, in printed form, and acceptable to all, lectures on every branch of the law. We, therefore, think it better for the student to occupy his time in learning, with our assistance, what others have written, than in learning from anything we could write. If our mode of teaching is more difficult for us, it is much more profitable to the student.

Moot courts constitute an important feature. Every student is required to bring suits in the forms adapted to all our courts. Professors act as judges, and students act by turns as jurors, clerk and sheriff.

There are two sessions. The first term for the years 1880-81 begins first Monday in September and ends January 20th. Second term begins January 24th and ends June 2d, 1881. Books of the Junior Class may be bought in Lebanon for \$35; Senior Class, \$45.

NEW BUILDING.

A new and superb building, Caruthers Hall, has recently been completed. It has been named in honor of Judge Robert L. Caruthers, on whose ground and by whose munificence, in great part, the building was erected. Others contributed nobly, but he more than any. In this elegant structure the Law School will hereafter be conducted.

Next term begins September 6, 1880.
